

# ALUMINUM RECYCLED SECONDARY INGOT (RSI)

Ecovery is a major supplier of aluminum products, including 11xx and 3xxx series RSI. The RSI is processed by melting various grades of primary scrap, and weighs on average 2,000 pounds per sow.

You can always expect a high quality aluminum sow, more than 98% pure. Our in-house laboratory employs strict procedures to sample each melt against a spectrometer to ensure our sows meet a consumer's specifications prior to shipping.

## SAMPLE CHEMISTRY

### 11xx Weighted Avg.

Al	Si	Fe	Cu	Mn	Mg	Cr	Zn	Ti	Ni	Cd	Ca
